EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering

CGPA: 8.33

Bhopal, Madhya Pradesh

Aug 2023 – May 2027

St. John's Senior Secondary School

Class XII (CBSE)

Class X (CBSE)

Kota, Rajasthan

2022 Percentage: 83.80%

2020 Percentage: 84.80%

TECHNICAL SKILLS

Programming Languages: C++, JavaScript, Python

Frontend Development: HTML5, CSS3, React.js, Tailwind CSS, JWT Authentication

Backend Development: Node.js, Express.js, RESTful APIs

Databases: MongoDB, SQL, Database Management

Core Computer Science: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Other Technical Skills: Software Testing & Debugging, Data Analysis, Report Generation, Technical Documentation, Process Automation

Tools & Platforms: Git, GitHub

Coding Profiles: Solved 100+ problems on LeetCode

EXPERIENCE

•IT/Technology Department Intern

Indico Motors Private Limited, Jamshedpur, Jharkhand (On-Site)

May 2026 – Jun 2026 (45 Days)

- Collected and analyzed operational data using spreadsheets and database tools to support internal reporting and decision-making.
- Assisted in developing and maintaining internal software applications, and performed testing and debugging of software modules to improve reliability.
- Supported database management and automated report generation, and prepared technical documentation while collaborating with the team on process automation and digital workflow improvements.

PROJECTS

•Disaster/Emergency Resource Locator [Code](#) [Live](#)

Jun 2026 – Jul 2026

Technologies: React.js, Node.js, MongoDB, Socket.io, Google Gemini API, Leaflet.js, JWT, Tailwind CSS

- Built a full-stack, crowd-sourced disaster relief coordination platform enabling real-time reporting and resolution of emergency requests (medical, food, shelter, rescue) with live geospatial mapping.
- Integrated Google Gemini API for automated request triage, classifying category and urgency (1–5 scale) and extracting key details from free-text descriptions to reduce manual sorting effort for volunteers.
- Implemented geospatial search using MongoDB 2dsphere indexing, enabling sub-second radius-based filtering of active requests for nearby volunteers.

•FlashCard Studio [Code](#) [Live](#)

Mar 2026 - Apr 2026

Technologies: React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Groq API (Llama 3.3 70B)

- Architected and shipped a full-stack AI flashcard generator (React, Node.js, Express.js, MongoDB, Groq Llama 3.3) from concept to production in 10 days, deployed on Vercel and Render.
- Engineered a generation pipeline producing 8 configurable flashcards (5–12) in under 2 seconds, cutting manual creation time by 95%, with JWT auth, unlimited decks/user, and 10MB PDF ingestion across 3 study modes
- Resolved production issues including secure API key management via environment variables and MongoDB connectivity, ensuring stable end-to-end deployment.

CERTIFICATIONS

– **The Bits & Bytes of Computer Networking** — Coursera

Dec 2025

– **Introduction to Machine Learning** — NPTEL, IIT Kharagpur

Jan–Apr 2025

– **Marketing Analytics** — NPTEL, IIT Kharagpur (Elite +Silver | Score: 83%)

Jan–Apr 2026

ADDITIONAL INFORMATION

- **Events Team Member, E-Cell** – Organized and coordinated events, managed participant communication, and supported team operations.
- **Languages** – Hindi, English.
- **Hobbies** – Cricket, Football, Cooking, Debate.
