PROFILE SUMMARY

Computer Science Engineering student with hands-on experience building AI-integrated applications, real-time data pipelines, and full-stack systems. Skilled in Python, JavaScript, SQL, LLM APIs, REST APIs, and cloud deployment. Experienced in translating product requirements into deployed, production-ready solutions and building automated, data-driven workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C++
AI/LLM: LLM APIs (Groq), Prompt Engineering, LLM-based Classification Pipelines
Backend: Node.js, Express.js, Flask, REST APIs
Frontend: React.js (Vite), HTML, CSS, Tailwind CSS
Databases: MongoDB (Atlas, Geospatial Indexing), MySQL
Cloud/DevOps: Render, Vercel, Git, GitHub Actions (CI/CD)
Testing: Jest, Supertest

EDUCATION

Vellore Institute of Technology	Bhopal, Madhya Pradesh
B.Tech in Computer Science and Engineering	Aug 2023 – May 2027
CGPA: 8.33	
St. John's Senior Secondary School	Kota, Rajasthan
Class XII (CBSE)	2022 Percentage: 83.80%
Class X (CBSE)	2020 Percentage: 84.80%

EXPERIENCE

•IT/Technology Department Intern

Indico Motors Private Limited, Jamshedpur, Jharkhand May – Jun 2026

- Worked across internal software development and maintenance, database management, and testing/debugging for operational business systems.
- Collected and analyzed operational data to support internal reporting and decision-making.
- Automated recurring internal processes and produced technical documentation for handed-off tools.

•Frontend Developer Intern

Unified Mentor May – Jun 2025

- Developed and maintained frontend components as part of a remote development team.

PROJECTS

•Disaster Relief Coordination Platform

LLM-Powered Full-Stack Platform – MERN, Socket.io, Groq API GitHub

- Designed an LLM classification pipeline (Groq API) auto-extracting category, urgency, and people-affected from disaster reports; evaluated multiple LLM providers to resolve production/billing constraints before settling on a stable option.
- Built automatic incident-clustering (geo-distance + category matching) and a volunteer resource-matching engine for real-time coordination intelligence.
- Shipped with real-time updates (Socket.io), 40 Jest/Supertest tests, a CI/CD pipeline (GitHub Actions), security hardening (rate limiting, input validation, injection sanitization), and live deployment (Render + Vercel).

Also built: Gym Management System & Student Result Analytics Portal (MERN/MySQL CRUD apps).

CERTIFICATIONS

- **Introduction to Machine Learning** – NPTEL, IIT Kharagpur (2025); **Marketing Analytics** – NPTEL, IIT Kharagpur (Elite + Silver, 83%, 2026); **Computer Networking** – Coursera (2025)

ADDITIONAL INFORMATION

- **Coding** – 100+ problems solved on LeetCode **Leadership** – Student Coordinator, E-Cell, VIT Bhopal **Languages**
 - Hindi, English
